

Our School Community Asset Mapping is a list of the positive and valued places, institutions, programs, and people that contribute to making our school and community a great place to learn and live. This Asset Mapping list allows you to learn more about the resources available to our school community, which can enrich our staff, parents and student's learning and physical well being. Additionally, this list is a way to support and enrich our staff, students and school families' involvement in our community.

**School Community Asset Mapping (For Green Team Action)**
